

Christian D'achiardi

FULLSTACK DEVELOPER

Medellín, Colombia | +57 300 425 7960 | ingchristian27@gmail.com | linkedin.com/in/christian-dachiardi

PROFILE

Full-stack software developer with 8+ years of experience building scalable, high-performance web applications using React, Node.js, TypeScript, Firebase, MongoDB, and cloud platforms (AWS, GCP). Track record of leading technical modernization efforts, reducing operational costs, and delivering solutions that directly improve conversion, performance, and revenue.

SKILLS

Languages / Frameworks: Node.js, TypeScript, JavaScript, Python, React, Angular, Express, NestJS

Databases: MongoDB, PostgreSQL

Cloud & DevOps: AWS (Lambda, API Gateway, S3), Google Cloud Platform (Firebase, Firestore, Cloud Storage), Docker, Serverless Framework

Testing & CI/CD: Jest, CircleCI

Languages: Spanish (native), English (professional)

PROFESSIONAL EXPERIENCE

Full Stack Developer — Blaze

Mar 2025 – Present

Remote (Brazil)

- Modernized the React application by updating 100% of obsolete libraries and refactoring deprecated code, cutting local compilation time by 70% and CircleCI-based CI/CD build time by 40%.
- Built a NestJS backend service integrating an AI-powered fraud detection engine into the gaming platform to combat bonus abuse in real time, protecting platform revenue.

Full Stack Developer — PeopleClerk

Jan 2021 – Mar 2025

Miami, FL

- Led technical modernization using React, TypeScript, Node.js, and NestJS, including delivery of AI-integrated features.
- Led the migration from Firebase/Cloud Functions to a more robust backend infrastructure, enabling a platform launch that scaled to 200+ courts nationwide.
- Built document automation and API integrations that helped 75,000+ users resolve legal issues and recover over \$10M in small claims.
- Optimized management processes, contributing to growth of site traffic to 200k+ monthly visits.

Frontend Developer — Bucket.io (via Ideaware)

Nov 2018 – Jan 2020

California, USA

- Expanded the React component library, adding customization options and improving website-building flexibility.
- Designed and implemented new templates, broadening the range of prototypes available to users.
- Built a scalable, tree-based data structure for funnel flows, ensuring compatibility across funnel types.

Full Stack Developer — BuscaRide

Mar 2017 – Nov 2018

Miami, FL

- Built the Node.js and Express backend and business logic for a fast-growing ride-sharing startup, establishing a scalable technical foundation.
- Developed a CRM with payment/account management and a rider-driver matching and routing module using Kotlin and Node.js.
- Integrated AWS (Lambda, API Gateway, S3) via the Serverless Framework, improving scalability and cost efficiency.

Full Stack Developer — RTC Digital Consulting

Nov 2015 – Feb 2017

Cartagena, Colombia

- Built a School Bus Monitoring App with real-time tracking, an administrative dashboard, and a mobile frontend; later modernized the mobile layer to React Native.
- Built scalable Node.js and Express backends supporting multiple client projects.
- Engineered a Shift Management System with a tree algorithm, deployed on Raspberry Pi devices across Colombia, reducing wait times in banks, hospitals, and notaries.
- Partnered directly with clients to translate business requirements into technical solutions.

EDUCATION

Systems Engineer — Universidad Tecnológica de Bolívar, Cartagena, Colombia (2013)
